- **Diet:** Primarily herbivorous, browsing on acacia leaves.
- **Heart:** Has a massive heart (up to 11kg) to pump blood up the long neck.

Giraffes have evolved unique social and survival traits.

- **Social Structure:** Live in loose “towers” or groups.
- **Sleeping Habits:** Only require 5 to 30 minutes of sleep in a 24-hour period.
- **Defense:** A single kick from a giraffe can be fatal to a lion.
